

Dear Members of the China-Italy Chamber of Commerce,

My name is Tommaso Matteo Lazzari, and I am putting forward my name to become a Board Member of the China-Italy Chamber of Commerce. I am currently the Founding and managing Partner of Seta Capital, a China-Italy M&A and Advisory firm. I have more than 15 years of experience in manufacturing, engineering and energy sectors. Prior to Seta Capital, I was CEO of ezTaxi, a digital venture backed by a leading Italian fund. Prior to ezTaxi, I was a senior engineer in General Electric Oil & Gas, where I was responsible for large oil & gas projects across Europe, North America and Africa. I began my career as a manufacturing engineer in SKF where I developed several patents on bearing applications. I hold an MBA from London Business School and a Master's degree in mechanical engineering from the Polytechnic of Turin. I am native speaker in Italian, fluent in English French and conversational level in Chinese.

I would like to join as a Board Member the China Italy Chamber of Commerce to further contribute to the Italian companies environment in China, helping them to further blend in the Chinese business by leveraging on my entrepreneurial experience, on my engineering background and on my contacts with local authorities.

As the Managing Partner of one of the few Italian service companies in China I also would like to bring forward the voice of the service industry that could be very beneficial to the Italian Companies ecosystem in China.

Shanghai
