

Salary Survey 2015

Roberto Dona'

27th March 2015

Roberto.dona@xjtlu.edu.cn

Introduction

- This survey has been promoted by the Suzhou Working Group (SWG) of the China Italy Chamber of Commerce (CICC) with the patronage of the CICC itself
- Roberto Dona' (International Business School Suzhou) has conducted the data analysis
- The long term goal of this survey is to have a permanent observatory to support the decision making process of the Italian companies

Goals and Limitations

- The goals of the survey are several and among the others the most important are:
 - A. Analyze the cost of the labour, the HR related policies and their impact on the business of the Italian companies in China
 - B. Provide to the managers of the Italian companies a benchmarking tools to make effective decisions in term of HR
 - C. Identify the major HR trends and issues for the incoming months.
- The survey has three very clear limitations:
 1. The structure of the questionnaire is designed for small/medium size companies and to mainly collect data about the local workers.
 2. The categorization of the different job profiles is too small to really understand the trends in the people management policies
 3. The small number of respondents has not allowed a more sophisticated level of analysis

Methodology

- A questionnaire designed around the professional roles of a medium size company and basically divided in two parts: Compensation and HR Management.
- No specific theory on HR Management but implicitly the model is based on functional areas of a very traditional value chain
- Categorization of the professional roles which mix together seniority and job description.
- The questionnaire has been delivered and collected by the CICC which also provided the consolidation of all data in a unified, anonymized data set.
- The data set has been analyzed in an anonymous form to avoid the distribution to third party of sensitive data.
- The data analysis used very simple mathematical functions because of the purpose of the research which is to provide a tool for making decision and not a sophisticated analysis of past events and transactions.

The Annex Documents

5

1. [The questionnaire](#)
2. [The analysis of compensation](#)
3. [The analysis of the HR policies](#)

The Sample

Total Number of Respondents	24
------------------------------------	-----------

Geographical Distribution	
Huzhou	1
Jiangsu	1
Jinshan	1
Shanghai Pu Dong	1
Suzhou Changshu	2
Suzhou SIP	11
Suzhou SND	4
Suzhou Wujiang	1
Suzhou Wuzhong	2

Legal Structure	
Holding	2
WOFE	22

Total Number of Empolyees	2,774
Average	116
Min	24
Max	394

Primary Industry	# of Companies	Employees
Automotive	2	160
Machinery/Industrial Equipment	12	1385
Medical supplies	3	522
Chemicals	1	100
Plastic/Metal Products	4	445
Other	2	162

Business Purpose	
Respondents	20
Production	14
Sales/Marketing	13
Trading	7
Sourcing/Procurement	10
Services	8
Production related engineering	11
R&D	4
Other	4

The Overall Results

<i>Area</i>	<i>Junior Operator</i>	<i>Change</i>	<i>Operator</i>	<i>Change</i>	<i>Senior Operator</i>	<i>Change</i>
Production Blue Collar	3,891	7%	4,735	10%	5,382	7%
Driver	4,545	4%
